

EDEN Response Notes

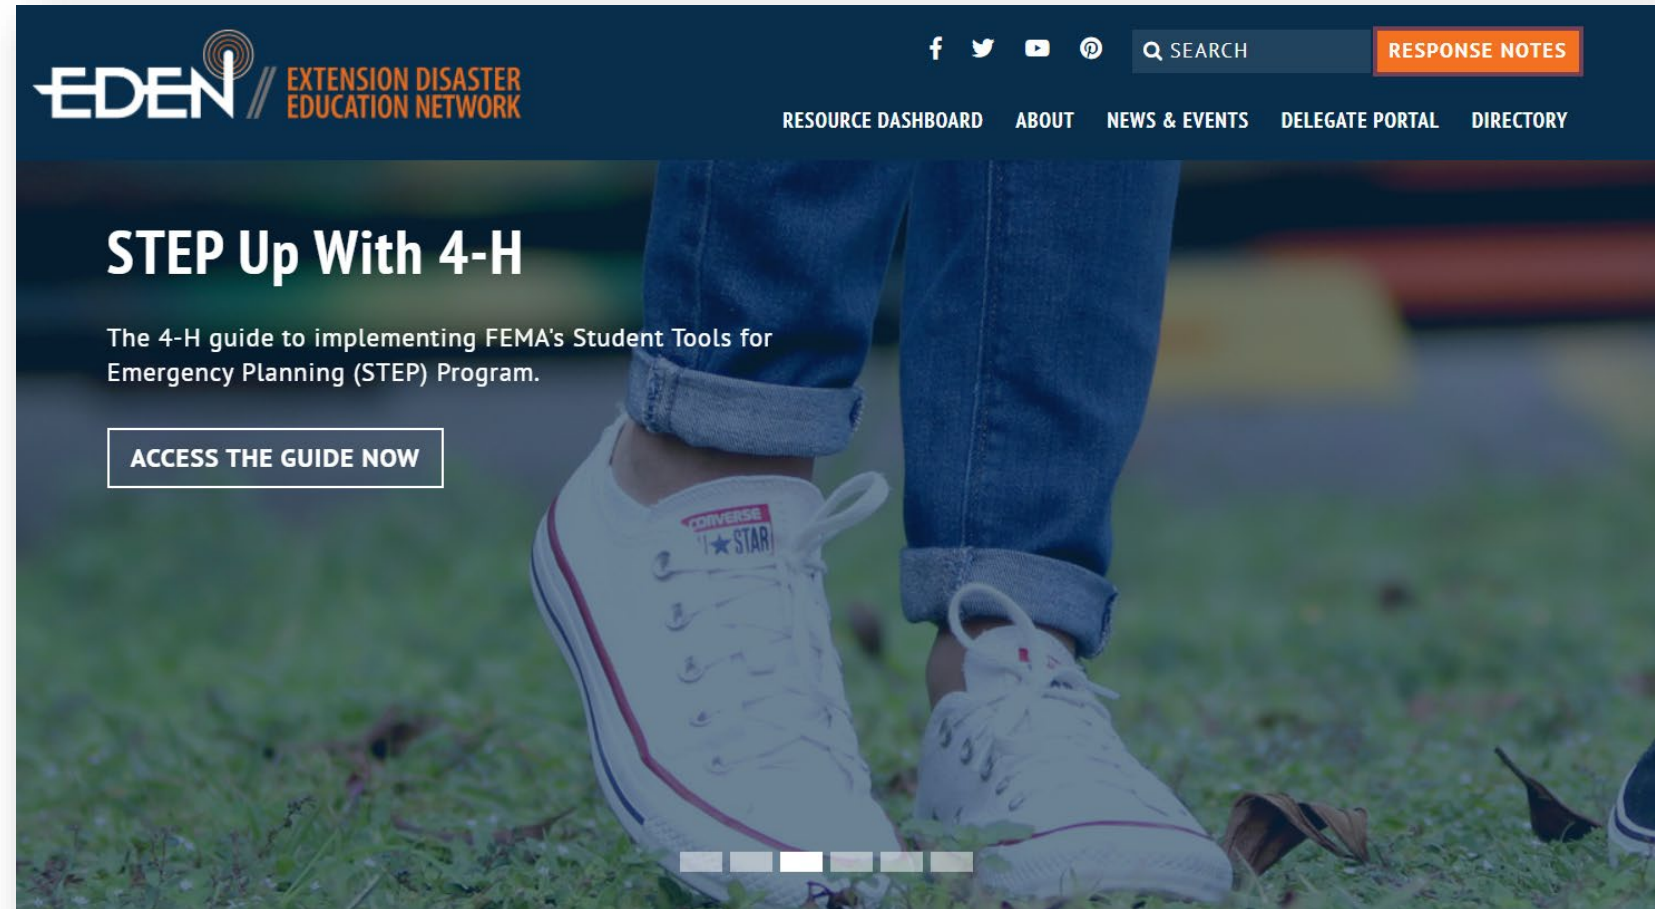

Conne Burnham, University of Missouri Extension

Soni Cochran, Nebraska Extension

EDEN Response Notes

EDEN Response Notes is the EDEN system for finding out if our Extension members need any type of assistance with disaster response and recovery, and learning about their response and recovery activities.

EDEN Response Notes

<https://extensiondisaster.net/delegate-portal/response-notes/>

- Quick-capture form
- Use to let EDEN and USDA liaisons know how your state has been affected in a disaster.
- Ask for help from fellow Extension professionals.

Road 739 Fire near Arapahoe, Nebraska. Nebraska State Patrol, April 2022

EDEN Response Notes

<https://extensiondisaster.net/delegate-portal/response-notes/>

- Share news about what you're doing to recover or help your community.
- Response Notes is NOT a substitute for the response reporting you would do as part of the local emergency response team.

Volunteers cleaning up after a flood (2019)

EDEN Response Notes

<https://extensiondisaster.net/delegate-portal/response-notes/>

- EDEN delegates are encouraged to use Response Notes and their institutional email address to share disaster response information.
- Each submission will carry a date/time stamp.

Farm near Wilber, Nebraska damaged by a tornado, S. Cochran (2004)

EDEN Response Notes

<https://extensiondisaster.net/delegate-portal/response-notes/>

- Submit as Response Notes as often as you like.
- Don't worry about spelling, grammar, polish or lingo. Submissions are managed and edited (for grammar, not content) before being distributed.

Flooding near Pickrell, NE. V. Jedlicka

Nebraska EDEN Response Notes

- System for helping our Nebraska Extension family "touch base" or "phone home" when disaster strikes.
- We collect responses first **and then submit** to EDEN Response Notes.

Hallam, Nebraska damaged by a tornado, S. Cochran (2004)

Nebraska EDEN Response Notes

- Depending on the report, may be shared with Nebraska EDEN, Nebraska Extension administration, EDEN, our USDA liaisons, and NEMA.

<i>Nebraska EDEN Response Notes</i>	
7/9/2019 14:56	
<i>County/area on which you are reporting:</i>	Dawson
<i>Event(s) on which you are reporting:</i>	Significant rainfall/Flood
<i>Situational awareness:</i>	Much of the east half of the county had 5+ inches of rain. Most of the roads I tried to get to town on were underwater. The emergency manager opened the high school for the red cross to house those displaced by water (mostly basement apartments in town). We still have a couple inches of water in our basement. <u>Think</u> most in the valley are in the same boat (so to speak). <u>Heard</u> from the Orscheln manager (by the way they are going to Lincoln County to get sump pumps) that a family at Elm Creek had 31 inches of water in their basement. Creeks are at or above bridges. Not sure if the water is going down or coming up. They are <u>talking</u> the possibility of another inch or so tonight. KRVN had a report of 7 inches of rain at Dar just as it began. That area was hit <u>pretty hard</u> .
<i>Impact on University/Extension personnel or facilities:</i>	
<i>University/Extension response efforts:</i>	I did call KRVN and remind them of some timely resources at flood.unl.edu
<i>Additional comments:</i>	

Nebraska EDEN Response Notes

Brent Curtis, Supervisor, State Watch Center, Nebraska Emergency Management Agency:

“During the 2019 irrigation canal collapse in the panhandle area, Nebraska Extension provided important updates on the situation to NEMA. These updates were key as they were used to help inform the safety community.”
